Dr. Alex Levenberg

Plastic Surgeon, Tel Aviv, Israel

One of the leading plastic surgeons in Israel, certified by the university of Milan. For the past 20 years , he has specialized in plastic surgery of the face , breast , liposuction , chemical peels and laser peel and various injections. He is a member of the Israeli Association of Plastic Surgery and to his record during the last decades thousands of successful surgeries , injections and cosmetic treatments.

“EnerJet’s new application is the “walk-in and walk-out” facelift or as I call it the “knifeless facelift”. It’s suitable for those women who seek immediate improvement without any downtime. They can come to my office, even during break time, perform the treatment and go back to work and see the improvement immediately.”

Dr. Pablo Naranjo

Medical director for elite laser clinic, Madrid Spain

Vice President of the Spanish Association of Aesthetic Medical Laser

Certified by the Complutense university of Madrid and currently serves as the European Medical Director of the prestigious laser technology for dermatology and aesthetic Syneron- Candela and also as a medical director of the Elite Laser Clinic in Madrid. He is considered to be one of the largest national and international experts in laser technology, ultrasonic and RF technologies for aesthetic medicine and dermatology.

Dr. Tapan Patel

Dermatologist

Founder & Medical director of PHI clinic, London, England.

Practicing cosmetic dermatology for the last 14 years, and specialize in a full range of procedures such as using injectables to give subtle natural results, laser procedures, treating patients with skin of color and treating scars.

"EnerJet is an amazing, new, innovative treatment that we offer at PHI Clinic. It is a treatment that we recommend for typically hard to treat skin indications; through introducing a jet of Hyaluronic Acid, it repairs scars, lifts facial tissue and can remodel the skin to give it a refreshed, more youthful look. EnerJet is not only a safe and non-invasive therapy, but the results achieved are long-term and lasting."

Dr. Ofer Sharon

President & CO founder of Valera Health

Physician and entrepreneur with extensive experience in both clinical and commercial product development for startups in health tech, biotech, and medical devices. As the former Medical Director for Merck Israel, he founded a big data research collaboration between the pharmaceutical industry and a large payer.

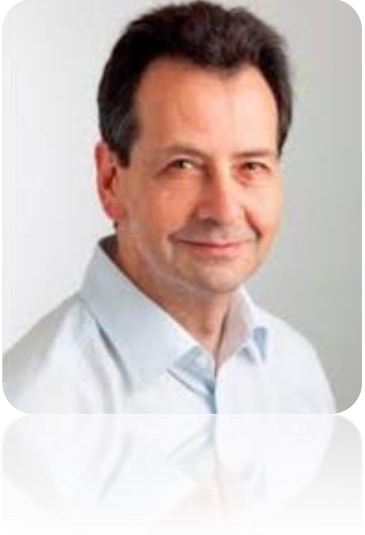

Prof. Daniel Cassuto

Plastic surgeon, Milano, Italy

Plastic Surgeon and a professor of Plastic, Reconstructive and Aesthetic Surgery. He runs a private practice in Milan and serves at the Plastic Surgery Department, University Hospital of Modena, focusing on the treatment of complications from dermal fillers.

"I have been using the technology for a few years now. It's the most effective treatment for stretch marks. It's also the first line of treatment for deep acne scars, that would not show such an improvement with any other type of technology. In both cases, the atrophic areas are regenerated."

Dr. Greg Goodman

MBBS, FACD, MD, has been a practicing dermatologist for more than 20 years.

His areas of specialty include skin cancers, Mohs micrographic surgery, lasers in dermatology, cosmetic dermatology, facial aging and the treatment of acne and acne scarring.

He is an associate professor at Monash University in Melbourne, Australia. He is chief of surgery at the Skin and Cancer Foundation of Victoria.
